Additional Privacy Notice for those participating in Virtual Meetings

Why we need your data

We require your data in order to enable your attendance at virtual meetings which are being held to enable decision making in light of the COVID-19 Pandemic.

What data we collect and the legal basis for doing so

The personal data Zoom will collect from you, in order to function properly, will include:

- name
- IP address
- location
- telephone number

The personal data that will be transmitted by Zoom from your device (e.g. mobile phone, tablet, laptop, etc.) may include:

- image/video (if you join via a video link and your device camera is switched on)
- voice (if you speak)
- name, as entered (if joining via a video link) or extract of telephone number (if joining via telephone and not withholding your number)

The legal basis for processing this data is public task.

Virtual Meeting Recording and Broadcasting

The video conference may be Broadcast on the internet to enable the public to see the meeting and may also be recorded to aid the production of the minutes. The following information will be broadcast / collected:

- image/video (if you join via a video link and your device camera is switched on)
- voice (if you speak)
- name, as entered (if joining via a video link) or extract of telephone number (if joining via telephone and not withholding your number)

The legal basis for processing this data is public task.

As both the transmission and recording of the images and voice of individuals can reveal information about them, the following special category data may also be collected:

- Race and ethnic origin
- Religious or philosophical beliefs
- Political opinions
- Trade union memberships
- Biometric data used to identify an individual
- Health data
- Data related to sexual preferences, sex life, and/or sexual orientation

The legal basis for recording the data is consent and what data is shared is determined by participants – whatever you say during a live streamed and recorded meeting will be broadcast and recorded.

Video conferencing activity processed by the data processor

The video conferencing tool will transmit meeting activity (such as joining or leaving), including activity related to third-party integrations, together with the date, time, person engaged in the activity, and other participants in the meeting.

It will also route audio and video call content and screen sharing content between call participants.

You can read more about [Zoom's privacy policy](#), and how it collects and stores data as well as its [cookies policy](#).
