Structural / Landscape Planting

Species List

Structural / Landscape Planting

Advanced Nursery Stock Trees

Fraxinus Excelsior

Quercus Robur

Woodland Mix

Trees

Quercus Robur

Fraxinus Excelsior

Sorbus Aria

Prunus Avium

Pinus Sylvestris

Populus Tremula

Betula Pendula

Salix Fragilis

Aesculus Hippocastanum

Castanea Sativa

Fagus Sylvatica

Acer Pseudoplatanus

Shrubs

Crataegus Monogyna

Corylus Avellana

Prunus Spinosa

Acer Campestre

Salix Cinerea

Ilex Aquifolium

Malus Sylvestris

Viburnum Opulus

Viburnum Lantana

Euonymus Europaeus

Ligustrum Vulgare

Rosa Canina*

Sambucus Nigra*

Salix Viminalis*

Salix Caprea*

Cornus Sanguinea*

Notes

Feathered trees and transplants to be planted on a single grid at 2.0m crs in staggered rows 1.0m apart. Shrubs to be confined to the outer 2-3 rows except for shade tolerant species – i.e. Cornus, Corylus, Ligustrum and Sambucus. Cut back species marked * at the time of planting.

All species to be evenly distributed

5% of all trees planted to be standards, 15% to be feathered, the remainder to be 1+1 450-600mm ht transplants. No large trees to be closer than 3.0m.

Rabbit-proof fencing to surround all planting areas.
