

# **SPECIFICATION FOR THE ERECTION OF STREET NAMEPLATES AND STREET SIGNS**

## **1.0 GENERAL**

- 1.1 Street nameplates are to be erected in the positions and to the direction of the Street Naming and Numbering service.
- 1.2 The full and proper names of the street will be supplied to the installer of the street nameplate. Also included will be a map showing the situation of the required nameplate

On larger developments a street numbering schedule will be provided to clarify numbering requirements.

## **2.0 NAMEPLATE SPECIFICATION**

- 2.1 Die Pressed Aluminium 11.S.W.G., 150mm deep with rounded edges. White background, with black border and black letters.
- 2.2 Lettering, 100 millimetre Ministry of Transport letters, capital lettering only for street names.  
Secondary titles i.e. 'Leading to....' Shall be 50 millimetre M.O.T. lettering formed in upper and lower case lettering.

In the case of no through road - No Through Road standard 'T' symbol to be included at the right-hand end of the nameplate.

- 2.3 Angle steel frame fixed to all free standing nameplates.

## **3.0 LEGS AND FIXING REQUIREMENTS**

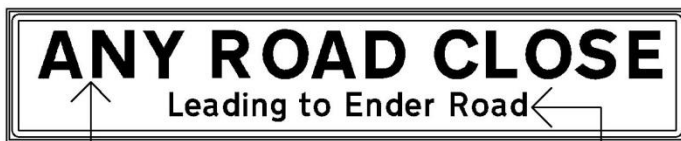

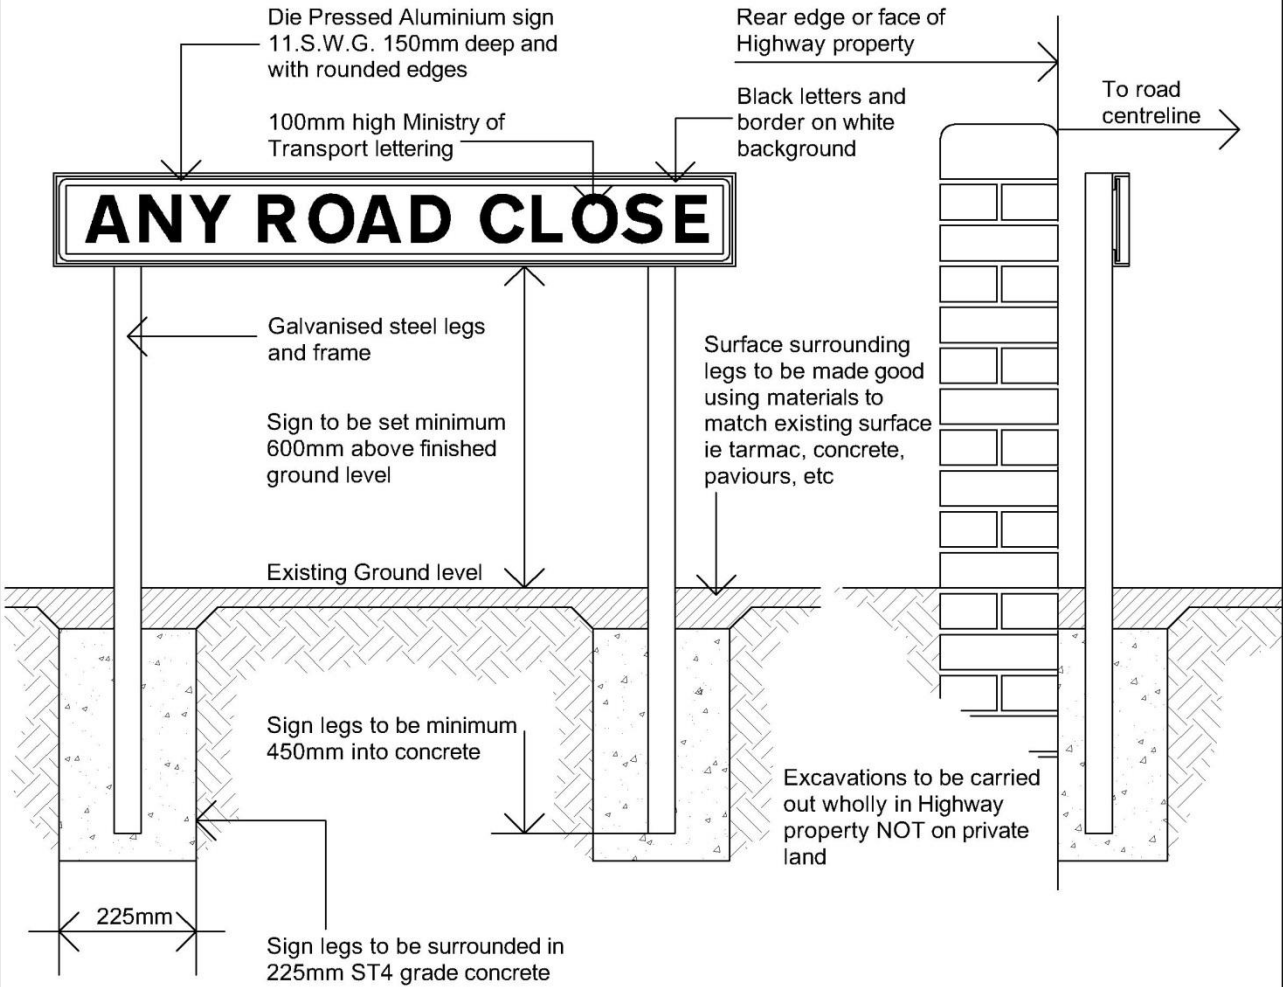

- 3.1 Box section galvanised legs.

Length to be sufficient to permit the legs to be securely fixed in concrete for a length of 450 millimetres, with the plate standing at not less than 600 millimetres above ground, pavement or adjacent highway levels.

Legs to be fixed in sufficient volume of concrete to withstand impact and vandal attack.

Surface surrounding legs is to be made good after installation in finish to match existing surface e.g. tarmac, concrete or block pavements.

# STREET NAMEPLATE FIXING SPECIFICATION
