

Policy HO8 Options – Home Builders Federation

The HBF is supportive of the Council's preferred approach to housing mix in Policy HO8 as set out in Option A. The HBF is also supportive of the proposed deletion of the requirement for 5% of market housing to be M4(3).

However at this time the HBF confirm that out previous objections to 50% M4(2), the NDSS and higher water efficiency requirements of Policy HO8 remain unchanged.

Yours sincerely
For and on behalf of HBF

Sue Green
